

# ACCESS WebVPN GlobalProtect Client Installation for Windows & Macintosh Computers

1. Open a web browser and go to <https://webvpn.access-k12.org>

2. Enter your username and password, as follows:

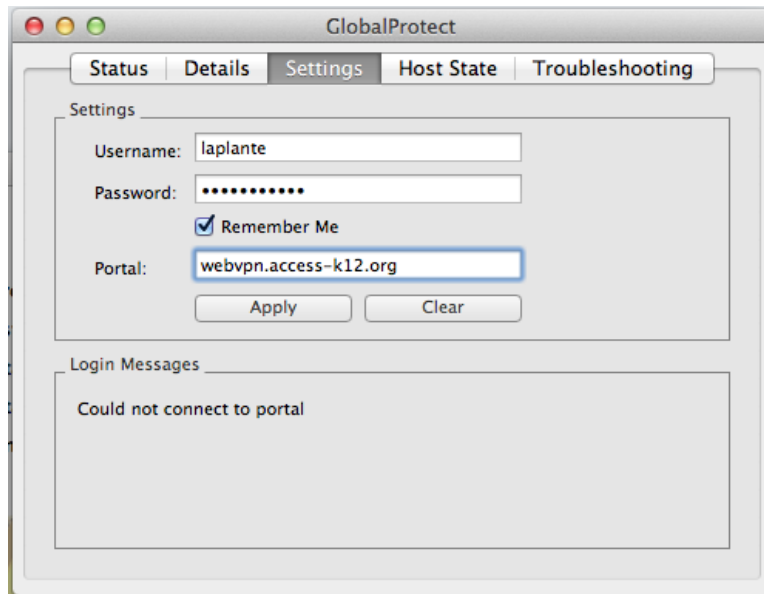

A screenshot of the Palo Alto Networks GlobalProtect Portal login page. The page has a light blue background. At the top, the text "Palo Alto Networks - GlobalProtect Portal" is displayed in a bold, dark grey font. Below this, there are two input fields. The first is labeled "Name" and contains the text "laplante". The second is labeled "Password" and contains a series of dots. Below the password field is a button labeled "Login".

3. Click the "Download **<Windows or MAC>** bit GlobalProtect agent":  
Select what is appropriate for your computer.

4. Install the client using all defaults.

- When presented with the configuration screen, enter your username, password, and **“webvpn.access-k12.org”** in the Portal: box.

- Click “Apply”. You will be connected to the ACCESS Network.
- You will see an icon in the bar at the top of the screen:

Connected to the network

Not Connected to the network

- To connect and disconnect, simply click on the icon and choose an option
