

Mail Marshall Spam Control Console

Mail Marshall is a program that filters all of your email for spam. Most real spam is caught and discarded and you never see it. In some cases, emails are mistakenly flagged as spam and blocked from reaching your Inbox. If you suspect that emails to your account are getting blocked, you can create a login for the Mail Marshall Spam Console. From there you can see what, if any, email has been blocked, block senders, etc.

To create an account, open your browser and go to:
<http://spam.access-k12.org/SpamConsole/UserLogin.aspx>

Next to the login window is a link to 'Register New User.' Click it and then enter your email address. A password will be sent to your email address.

You may now login and check for blocked emails and manage senders (allow from or block from)

Notice also, there is a 'Change Password' option on the screen.
