

# Setting Up Google Mail On Your Mobile Device

## **Mobile Setup**

A popular request once we go live will be to setup mobile phones, tablets, etc. with the connection to Google. Unfortunately, these settings will have to be changed on the mobile devices to point them to Google. But the good news is that Google has prepared some outstanding directions for how to setup mobile devices. Please see the link below for directions for each of the major types of devices (Apple, Android, Blackberry, and Windows Phone):

There are quite a few options for setting up mobile devices, so be sure to select the correct option for you.

PLEASE NOTE: For iPhone users, when you setup your new connection, please note that you use the "Exchange" setting and not "Gmail". The use of Exchange will make sure that you have the ability to sync your mail, calendar, and contacts with Gmail.
